

mathematics 100 section 101 mid-term exam results

General Comments

- Failure is not final. If you did not do well in this mid-term exam, there is still the final exam. **If you do significantly better in the final exam, the midterm will count less than the announced 25% towards the final grade.** (The exact change of the percentages is at the IIC's discretion.)
- Many people were unable to identify the intermediate value theorem correctly. **There is no excuse for this, it was a standard bookwork question!**
